

Exhibit 17 ISO Standards

June 22nd 2011

Production of the New York State CBIC (Common Benefit Issuance Card) cards must adhere to the ISO Standards listed below.

ISO/IEC Standard 7810 :Identification cards- Physical characteristics
All relevant sub sections up to sub-section 9

ISO/IEC Standard 7811
Part 6: Magnetic Stripe; High Coercivity

ISO/IEC Standard 7811 Part 2: Magnetic Stripe; Low Coercivity *.

Note* This section applies to the "Vault Card " in which the OTDA has chosen to use a Lo-Coercivity mag-stripe due to the disposable nature of the card.

ISO/IEC Standard 7812:
Part 1; Numbering System
Part 2; Application and Registration Procedures

ISO/IEC Standard 7813: Information technology- Identification cards/Financial Transactions
Section 7: Track Data Structure and Information
Sub section ,7.2: Track 2 Structure and Information Content.

Cards produced for the New York States OTDA CBIC program will be subject to random testing for ISO compliance throughout the life of the contract in accordance with the pre-defined schedule listed within the contents of the RFP.
