

2012-2013

Home Energy Assistance Program
Heating Equipment Repair and Replacement

Revised December 5, 2012

BENEFIT COMPONENT

- Heating Equipment Repair and Replacement benefits are available to provide HEAP eligible households with the cost of repair or replacement of the applicant owned dwelling's primary heating equipment when the equipment has been documented by a participating vendor to be inoperable or unsafe and is in need of repair and/or replacement.
- Heating equipment replacement is also available, under limited circumstances and with medical documentation, to replace systems that are directly detrimental to a household member's health. Documentation must be in writing from a physician and must specify the reason(s) why the current system is directly detrimental to health/safety.
- Temporary relocation for an eligible household may be considered when the residence has been determined to be unsafe and it has been determined that the deficiencies cannot reasonably be corrected in a timely manner which would ensure safe, healthy habitation.
- A new "**Assessment Form**" has been developed to assist districts in assessing the heating equipment situation. The form is optional and locally reproduced. The form is not a substitute for any other required forms and cannot be used to determine eligibility.

COMPONENT OPENING DATE

The component will open October 1, 2012

CERTIFICATION

- The local social services district (SSD) is the sole certifier for this component. The SSD may contract with alternate certifiers to assist in the application/outreach process.
- Alternate certifiers may not make final eligibility decisions, contract for work, guarantee benefits or issue notices.
- **All applications for this component require supervisory review**, even in those districts using a case supervisory review process for other types of HEAP applications.

TIMEFRAMES and EMERGENCY RESOLUTION

Emergency Resolution Requirements

- Appropriate action(s) must be taken to resolve the emergency situation within 18 hours of the **emergency benefit** application filing date if the household is without heat or within 48 hours of the **emergency benefit** application filing date if loss of heat is imminent.
- Emergency resolution is defined as the action taken to ensure that the applicant household has heat or will continue to have heat, including access to temporary alternate housing or safe supplemental heat.

- The **filing date** for Heating Equipment Repair and Replacement applications is the date that the **applicant completed, signed and submitted** the HEAP application form to the SSD or to the alternate certifier contracted to accept applications.
- **Some action**, regardless of eligibility status, **must be taken** to resolve the emergency heating situation within 18 hours from the emergency benefit filing date for households without heat and within 48 hours for households where loss of heat is imminent.
- The emergency resolution action(s) for those applicants for Heating Equipment Repair or Replacement where HEAP eligibility cannot be determined within the 18 to 48 hour timeframe or the applicant is not HEAP eligible are:
 - A referral to Temporary Assistance
 - A referral to a community resource
 - Provision of safe supplemental heat
 - Provision of temporary housing or access by the household to temporary alternative housing.
- The emergency resolution action(s) for those households applying for Heating Equipment Repair or Replacement, where HEAP eligibility is determined, are:
 - The repair of the heating system within the 18/48 hour timeframe
 - The replacement of the heating system within the 18/48 hour timeframe
 - The provision of safe supplemental heat
 - Access to temporary alternate housing
 - Provision of emergency HEAP funded temporary housing
- In both situations, more than one action may be appropriate.
- All Resolutions must be documented on the Heating Equipment Repair and Replacement Worksheet (LDSS-4867).
- Example A: A HEAP application for Heating Equipment Repair or Replacement is filed on 12/3/12 with an eligibility interview conducted the same day. It is established that the household is in an emergency situation as their heating equipment is not working and they have no heat. The applicant does not have documentation of the household's income. The application is pended for documentation of income. Since we are aware that the household is in a no heat emergency situation, an action to resolve the emergency situation must be taken within 18 hours of the application filing date, 12/3/12. Since HEAP eligibility cannot yet be determined, appropriate resolution may be in the form of a referral to TA, a referral to a community resource, the household stating that they have or can be provided with a safe supplement heat source or that they have access to temporary alternate housing. The action taken to resolve the emergency must be documented on the Heating Equipment Repair and Replacement Worksheet (LDSS-4867).
- Example B: A HEAP application for Heating Equipment Repair or Replacement is filed on 12/3/12 with an eligibility interview conducted the same day. It is established that the household is in an emergency situation, as they have no heat due to irreparable heating equipment. The applicant has all documentation and the household is determined

eligible. Since the certifier is aware that the household is in a no heat emergency situation, an action to resolve the emergency situation must be taken within 18 hours of the application filing date, 12/3/12. It will take at least three days to install the new heating equipment. The household does not have access to safe supplemental heat or temporary alternate housing and is requesting relocation. Temporary relocation is part of the HEAP emergency component, which does not open until January 2, 2013, so HEAP funds cannot be used to pay for relocation. The emergency resolution for this household must be a referral to TA or to a community resource to assist with the cost of relocation. The action taken to resolve the emergency must be documented on the Heating Equipment Repair and Replacement Worksheet (LDSS-4867).

- Example C: A HEAP application for Heating Equipment Repair or Replacement is filed on 12/3/12 with an eligibility interview conducted the same day. It is established that the household is in an emergency situation, as their heating equipment is not working and they have no heat. The applicant has all documentation and the household is determined eligible. Since the certifier is aware that the household is in a no heat emergency situation, an action to resolve the emergency situation must be taken within 18 hours of the application filing date. The heating equipment repair can be completed today which is within the 18 hour timeframe for resolution of a no heat emergency. The action taken to resolve the emergency must be documented on the Heating Equipment Repair and Replacement Worksheet (LDSS-4867).

Completion of Work

- As a general rule, the heating equipment repair or replacement work should be completed within five business days from the authorization by the SSD. Vendors must notify districts if they cannot meet these timeframes and provide the reason.

Processing Timeframes

- Applications for Heating Equipment Repair and Replacement may be pended for no more than a total of ten (10) business days. Emergency resolution rules must be followed for pended cases.

Notice Requirements

- Applicants must be provided with written notice of the eligibility decision no later than thirty (30) business days **from the date of the receipt of the final vendor invoice** for payment.

BENEFITS

1. REPAIR

- The essential heating equipment repair total benefit is limited to \$3,000 per applicant per HEAP program year.
- In some cases, the cost of repair may exceed or be comparable to the cost of replacement. In these cases, the local SSD should explore replacement. A heating system that requires multiple repairs in a program year, or within the past

program year, may warrant the exploration of replacement instead of continued repair.

- Repair of essential primary heating equipment is defined for purposes of the NYS HEAP Program as the labor and materials necessary to restore or fix an eligible household's essential heating equipment to a sound useable condition without the replacement of the heating plant (furnace/boiler). This includes repair or replacement of chimneys or other venting systems and repair or replacement of oil tanks. All repairs must include the inspection and installation of a working carbon monoxide detector when one is not present, inoperable or the carbon monoxide detector is over five years old.
 - For example, a household's furnace is working, but the oil tank is leaking and needs to be replaced. Under this definition, this would be coded on WMS as an H5 and paid as a repair since the actual furnace was not replaced.
- In counties outside of NYC, WMS payment code H5 is used for repair of essential heating equipment.

2. REPLACEMENT

- The essential primary heating equipment replacement benefit is limited to **\$6,500**.
- Eligible households may receive one heating equipment replacement benefit within a ten-year period. This limitation also applies to the owner of a two-unit building who moves to another unit within the same residence.
- Replacement of essential primary heating equipment is defined for HEAP Program purposes as the materials and labor necessary to restore and/or fix an eligible household's essential heating equipment to a sound useable condition by removal of an existing heating plant and replacement with a new heating plant. Replacement may also include the repair/replacement of essential heating equipment necessary for the system's safe and proper operation.
- Essential heating equipment may include chimneys, chimney liners or other direct venting systems and oil tanks.
- The inspection and installation of a working carbon monoxide detector when one is inoperable or not present, is required for all replacements.
 - For example, a household's furnace needs replacement, but the oil tank is also leaking and needs replacement. Under the definition, the cost for both the furnace and the oil tank replacement would be coded on WMS as an H7 payment and paid as a replacement, even if the work is done by different vendors. This action requires writing multiple payment lines in WMS.
- In counties outside of NYC, WMS payment code H7 is used for replacement of essential heating equipment.

3. SCOPE OF WORK

- All work, whether repair or replacement, must be approved and authorized by the local SSD prior to the commencement of any work.
- Work is limited to the primary heat source. This is defined as the equipment used within the twelve (12) month period prior to the month of application to heat the majority of the dwelling and is located inside the dwelling, with the exception of outdoor wood boilers and exterior units that are encapsulated.
- Repair of the existing inoperable heating equipment must be explored prior to replacement. Replacement of essential primary heating equipment may be explored in situations when a licensed qualified participating vendor provides a written statement documenting the current existing primary heating system is:
 - Inoperable and/or unsafe and the reason why; and,
 - Written verification that essential heating equipment cannot be repaired.
- Portable space heaters are not considered a primary heat source and are not eligible for repair and/or replacement under this component.
- **All replacement equipment must be Energy Star or High Efficiency furnaces and boilers rated at a minimum of 92% efficiency or greater. Installation of non Energy Star rated/High Efficiency equipment may only be considered when Energy Star rated or 92% or greater High Efficiency heating equipment cannot be obtained within a reasonable timeframe or when the cost of the Energy Star rated/High Efficiency heating equipment exceeds the benefit limit of \$6,500.**
- At the household's request, inoperable/unsafe primary heating equipment may be replaced with a different type of system if the cost of the alternative system is comparable (defined as \$500 or less) to replacement with the same type of system. The final approval for replacement with a different system type is made by the local SSD.

NOTE: The cost of removal or proper abandonment of the heating equipment in accordance with all State and local codes and regulations must be included in the job scope.

- Work is limited to essential components of the primary heating equipment necessary to ensure that the heating system will operate safely and within all applicable State and local building codes.
- All repairs and replacements should, with client consent, include installation of a programmable thermostat.
- Installation or repair of fuel tank gauges may be included as part of the repair of essential equipment if original gauges are faulty or nonexistent.
- All repairs or replacements on either State or sovereign lands must be completed to the satisfaction of all State and local codes, in addition to individual sovereign nation's protocols and rules.

- In the case of boilers with frozen pipes, HEAP benefits may assist with repairing the sections of piping absolutely necessary for the safe and proper installation and operation of the boiler.
- All repair and replacement jobs must include the inspection and installation, as per manufacturer's specification, of at least one carbon monoxide detector when one is not present, inoperable or the carbon monoxide detector is over five years old.

4. APPLICATION REQUIREMENTS

- All applications for Heating Equipment Repair and Replacement must be made in person, including those from TA or SNAP recipients, using the current version of the NYS HEAP application (LDSS-3421, Rev. 5/12).
- The homeowner must be the applicant.
- An in person interview is required for ALL applications.
- Full documentation is required for ALL applications.
 - Districts should use any permanent documentation already on file.
- An authorized representative is permitted to apply for Heating Equipment Repair and Replacement benefits on behalf of the homeowner. The authorized representative must provide a written statement signed and dated by the homeowner.
- An individual with a power of attorney is permitted to apply for Heating Equipment Repair and Replacement benefits. The power of attorney must be documented in writing.
- Reasonable accommodations should be explored with homebound applicants to assist with application requirements.
- A regular benefit must be processed for any household eligible for a repair or replacement in those cases where the household has not received a regular benefit at the time of application for equipment repair or replacement provided the Regular component is open.

ELIGIBILITY

1. INCOME

- Households must meet the established HEAP income guidelines for the program year to be eligible.
- A household is categorically income eligible only when the homeowner/applicant is in active receipt of TA, SNAP or Code A SSI.
- Income deeming does NOT apply to applications for repair or replacement.

2. CITIZENSHIP REQUIREMENT

The applicant must be a US citizen, US National or meet the qualified alien rules. Applicants must be provided with the Qualified Alien Information upon request. Applicants who do not meet citizenship rules are not eligible to receive heating equipment repair or replacement benefits.

3. RESIDENCE AND OWNERSHIP REQUIREMENT

- The applicant must be a New York State resident.
- The applicant must be the documented owner of the dwelling. For purposes of the Heating Equipment Repair and Replacement component, ownership is documented by a recorded deed or title. Deeds are recorded on all property transfers. Titles are issued for manufactured homes 1995 or newer. In the case of manufactured or modular homes sold prior to 1995 and which are not titled, applicants must provide a bill of sale in conjunction with supporting documentation listed below.
- The applicant must have owned the residence for the 12 months preceding the month of application.

Ownership MUST be documented by obtaining the following items:

HOUSING TYPE	ACCEPTED OWNERSHIP VERIFICATION	INFORMATION NEEDED IN CONJUNCTION WITH OWNERSHIP VERIFICATION
Single and two family homes	Recorded Deed or verification obtained through the county's real property tax website.	
Mobile homes 1995 or newer	Title	
Mobile homes older than 1995	Bill of Sale OR sales contract PLUS one of the following: 	<ul style="list-style-type: none"> ○ Tax Bill/Paid Tax Bill Receipt OR ○ Mortgage papers/payment book or loan payment receipts OR ○ Mobile Home lot rent receipts/statement from park owner OR ○ Loan papers

- The dwelling must be the applicant's primary dwelling.
- The applicant must have resided in the dwelling for which assistance is being requested for the 12 months preceding the month of application. Documentation may be requested when there is reasonable doubt that the applicant has met this requirement. Documentation includes, but is not limited to: mail with the applicant's name and address received during the time period; bills for services such as phone, utility, trash pickup; school records, voter registration documents that contain the address; and employer records.

- The applicant must be residing in the household for which assistance is being requested at the time of application for Heating Equipment Repair and/or Replacement benefits.
 - A household that has temporarily relocated due to the lack of heat or unsafe conditions or who meets other HEAP temporary absence rules as outlined in the HEAP Manual is considered to meet the residence requirement.
- The applicant must document that the equipment being replaced or repaired has been the primary heating equipment in the dwelling within the 12 month period preceding the month of application. This may be accomplished through client documentation such as fuel delivery slips or confirmation of delivery and/or payment for fuel, confirmation through a utility website that the account has been active and gas or electric costs incurred, or collateral contact with the home energy vendor.
- Life estate and life use are considered ownership unless the deed or life estate contract specifies that the deeded owner, not the individual with life use, is responsible for repairs and/or maintenance. Life use/estate must be either part of the deed or other legal document executed at the time of the original property transfer. Modifications made to meet eligibility requirements do not meet ownership requirements for this component.
- Applicants who live in a dwelling that is being purchased through a land contract or reside in a rent to own dwelling are prohibited from receiving a Heating Equipment Repair/Replacement benefit. Land contracts and rent to own agreements are not considered ownership situations for HEAP.

4. RESOURCES

- All applicant households for Heating Equipment Repair and Replacement must be resource tested. This includes TA and SNAP recipients even if the household is categorically income eligible.
- Resources for all household members, as defined by HEAP, are counted.
- Resources must be explored and availability determined. The resource checklist on the Heating Equipment Repair and Replacement Worksheet (LDSS-4867) must be completed. Only liquid available resources are counted.
- All applicants for Heating Equipment Repair and Replacement receive a standard resource exclusion of \$3,000 in addition to all other applicable exemptions.
- The available amount of resources is determined by reviewing the allowable exemptions in the HEAP Manual.
- Applicants who have available liquid resources, after exemptions are applied, that equal or exceed the cost of the repair or replacement are not eligible. If the available resources are less than the cost of the repair or replacement, applicants are required to apply any available liquid resources after exemptions to the cost of the repair or replacement.

- Resources of Co-Owners

- If the dwelling is co-owned and the co-owner(s) does not reside in the dwelling, the district must explore the availability of resources and contributions from the co-owner(s). Resources are determined in the same manner as for the applicant.

NOTE: Applicants who are victims of documented domestic violence situations may be exempted from documenting a co-owner's resources if producing the documentation could exacerbate the domestic violence situation or place the applicant at risk.

- Only a prorated share of the repair/replacement cost may be paid with HEAP funds when:

- 1) The co-owner(s) is not accessible,
 - 2) The co-owner(s) refuses to provide documentation of resources, and/or,
 - 3) The co-owner(s) has resources exceeding the established limits.
- Applicants should be referred to other programs to obtain the balance of a prorated HEAP payment (TA, Catholic Charities, Weatherization, etc.).
 - Applications requiring either an applicant or co-owner(s) contribution toward the cost of either a repair or replacement must be permitted ten business days to provide documentation of payment or satisfactory payment arrangements with the vendor. This must be documented with a Request for Information/Documentation Requirements form (LDSS-3431, Rev. 5/12). The emergency resolution timeframes and rules must be followed in these cases.
 - Resources of the co-owner(s) are documented and availability determined in the same manner as the applicant's resources.

NOTE: The complete cost of the heating equipment repair/replacement is paid by HEAP when both the co-owner(s)'s and the applicant are documented resources are at or below the resource limit.

OTHER REQUIREMENTS

- A participating licensed heating professional or local Weatherization Assistance Program provider must document that the applicant owned primary heating equipment is inoperable or unsafe and is in need of repair or replacement.

- The dwelling must be in compliance with local building and safety codes, must not be in condemned status, and must be safe and structurally sound.
- The applicant's household must not be considered to be unsafe and/or unfit for habitation.
- Dwellings with more than two units are not eligible for repair or replacement.

JOB PROPOSAL PROCESS

1. SUBMISSION OF ESTIMATES

- Estimates must include a detailed job scope with labor and materials costs.
- Estimates must be completed based on the requirements of the Job Proposal form and NYS Heating Equipment Vendor Agreement (Rev. 9/12).
- HEAP policy requires that the district contract with the lowest qualified bidder.
- A vendor other than the lowest bidder may be awarded the job on a case by case basis and with approval from the NYS OTDA. Allowable exceptions include, but are not limited to: past issues with the proposals or work of the lowest bidding vendor; inability of the lowest bidder to complete the work within five business days; inability of the lowest bidder to obtain or install Energy Star rated equipment when applicable and customer contracts or long term relationships with a vendor other than the lowest bidder.
- All estimates must be submitted on the current Job Proposal form (LDSS 4867A) and require both vendor and customer signature to attest that the estimate was prepared based on an on-site assessment.
- Estimates that are not based on an onsite assessment are not valid and may not be accepted.
- Only vendors with a signed Vendor Agreement on file with NYS OTDA may perform work.
- Districts should use local procedures for obtaining job proposals for repair and replacement work; however, multiple bids are not required for repairs of \$500 or less. SSD must approve the vendor to perform work prior to commencement of work.
- A minimum of two job proposals are required for all replacement work above \$3,000.
- The SSD must obtain NYS OTDA approval for replacements exceeding \$4,500. All replacement approvals must be documented on the LDSS-4867 and include the OTDA liaison with whom they spoke as well as the date of approval.
- The SSD should offer applicants the opportunity to obtain their own job proposals. Vendor lists may be provided to assist applicants. If the applicant declines the offer and requests assistance with obtaining bids/estimates, this should be noted in the case record and the SSD may contact vendors on the applicant's behalf.

- The SSD may request a waiver from the requirement to obtain OTDA approval if the average cost of replacements in that district consistently exceeds \$4,500.

2. PAYMENTS FOR ESTIMATES

- Reasonable costs associated with obtaining job estimates and/or documenting the condition of the system and/or to provide an estimate of work is an allowable expense. The additional conditions below also apply.
- The cost of estimates may only be paid for **eligible** households. Districts must not incur costs or require applicants to incur costs for estimates prior to the eligibility determination.
- WMS code H0 is used to pay for estimates for vendors that are not awarded the repair or replacement job.
- Multiple estimates are not required for repairs that do not exceed \$500.
 - Vendors must request and receive local district approval prior to commencing any work.
- Districts with a single source Heating Equipment Repair and Replacement contract may **not** pay for estimates with program funds. These costs must be part of the contract and must be paid from administrative funding.

3. PAYMENTS FOR HEATING EQUIPMENT REPAIR OR REPLACEMENT

- Prior to authorizing payment for Heating Equipment Repair or Replacement benefits, local districts must contact the client to confirm the installation and operation of the heating unit.
- Prior to authorizing payment for the HEAP prorated amount, it must be documented that the client and or co-owner(s) share of the cost has been guaranteed or paid, or the client has made satisfactory payment arrangements before the HEAP payment is authorized.
- Vendors must submit an itemized, final bill on company letterhead that has been signed by the customer after work is completed. A copy must be retained in the case record. Itemized bills should include the total amount of labor costs, in addition to the amount of the unit. (A signed company work order stating job completion will suffice if final invoice not signed.)

Bills must be submitted no later than 15 business days after work completion. Districts may not pay vendors until the work has been completed, an itemized bill received, and client confirmation of satisfactory work completion has been obtained.

- No pre-payment or deposits are permitted.
- No New York State sales tax may be charged.

- Heating Repair or Replacement payments are issued directly to the vendor after completion of all work, submission of final itemized bill and client confirmation of installation and operation of the heating system.
- Payments are issued through the NYS Office of State Comptroller process. Districts should make every effort to authorize and pay in a timely manner. It is strongly recommended that payments for Heating Equipment Repair and Replacement be selected for one week processing in those districts currently on a two week voucher review period.

4. FILE REQUIREMENT

- All case files must contain:
 - A current signed and dated Application, with a completed page six (Agency Use Section)
 - All supporting documentation
 - Heating Equipment Repair and Replacement Worksheet (LDSS-4867)
 - Job Proposals (LDSS-4867A)
 - Final itemized bills which include the customer's signature
 - Case notes
- Case records for heating equipment replacement must be retained for ten years.

5. Case Supervisory Review

- SSD's must review all applications for Heating Equipment Repair and Replacement.
- All applications for Heating Equipment Repair and Replacement must be reviewed by a county employee at least one level above the county employee certifying the application for assistance.

PROHIBITED PAYMENTS

Payments for heating equipment repair or replacement may not be made under the following circumstances:

- The applicant has not owned and resided in the dwelling for the 12 months prior to the month of application.
- The applicant has failed to document that the heating system in need of repair or replacement has been the primary heating system for the 12 months preceding the month of application.
- Reimbursement for work that was started and/or completed prior to the applicant's HEAP eligibility determination.

- Work that was not authorized by the SSD.
- Replacements or repairs will not be authorized for residences with more than two units.
- Payment for repairs or replacement for heating equipment that is inoperable due to flood, fire, or other natural disasters.
- Payment for repair and/or replacement may not be made in situations where the dwelling has been determined to be unsafe, is not habitable, or is out of compliance with building/safety codes and the situation cannot be corrected in a reasonable or cost effective manner in order to ensure safe and healthy habitation.
- Payments for replacements cannot be made to install heating systems in dwellings where a current system does not exist.
- Payment cannot be made when the applicant's homeowners insurance is available to pay for the repair or replacement.
- Applicants whose primary equipment was replaced using HEAP funds within ten years from the date of application are not eligible for another replacement.
- Applicants whose residence is for sale and who have a signed sales contract are not eligible for repair/replacement benefits.
- Eligibility for applicants whose dwelling is in the process of foreclosure or for sale on the open market must be assessed on a case-by-case basis to determine when and if the premises will actually be vacated by the applicant.
- Payments for parts and labor charged for the repair or replacement of any optional or non-essential heating system components should not be made; however, a programmable thermostat and broken or nonexistent fuel tank gauges should be installed, with client consent, on all repairs and replacements, whenever practical.
- Roadworthy trailers or mobile homes registered with the Division of Motor Vehicles are not considered permanent primary residences.
- Payments for prorated furnace replacement benefits if the necessary supplemental funding is unavailable or co-owners available resources are unavailable are prohibited.

Summary of changes and reminders for 2012-13

- The component opens on October 1, 2012. Applications will be accepted through March 15, 2013, provided there is sufficient federal funding. The application acceptance period may also be extended if federal funding permits.
- An optional Assessment Form may be used to assist workers in the assessment of the heating equipment situation.
- Repairs and replacements must include inspection and installation of a carbon monoxide detector if dwelling does not already have one or it is inoperable.

- HEAP funding is available to replace a heating system for an applicant only once in a ten year period. The provision that allowed replacement of a heating system sooner if the applicant moved has been eliminated.
- Replacement heating equipment must be Energy Star or high efficiency equivalent. Use of non Energy Star/high efficiency equipment should only be considered when Energy Star/high efficiency heating equipment cannot be obtained within a reasonable timeframe or when the cost of the Energy Star/high efficiency heating equipment exceeds the \$6,500 limit.
- Replacement of a system with a different type of system, for example: oil hot air to gas hot air, is permitted if the cost difference is \$500 or less.
- The applicant must have owned and resided in the dwelling for the 12 months prior to the month of application and must have resided in the dwelling for the same time period. Temporary absence provisions apply.
- The heating equipment that will be repaired and or replaced must have been the primary heat source during all or part of the 12 months prior to the month of application.
- The \$3,000 resource exclusion applies to repairs as well as replacement. Households whose available liquid resources equal or exceed the cost of repair or replacement are not eligible.
- Prior to authorizing payment for Heating Equipment Repair and Replacement benefits, local districts must contact the client to confirm the installation and operation of the heating unit. All applicants must apply in person, complete a full application and provide all applicable documentation. Homeowner/applicants in receipt of recurring TA, SNAP or Code A SSI at the time of application are categorically income eligible and are not income tested.
- All applicants, including categorically eligible applicants, are resource tested and must meet the HEAP resource test based on countable and excluded resources defined by HEAP. The Agency Use Section on page six of the NYS HEAP Application (LDSS 3421) must be completed in addition to the Heating Equipment Repair and Replacement Worksheet.
- Bids must be provided on the HEAP Job Proposal form unless the vendor's own bid submission contains all information requested on the Job Proposal form and includes a signature by the applicant to certify the bid was based on an onsite assessment.
- Payments for a job proposal to the vendor awarded the job are not permitted.
- Payments to the weatherization agency for pre and post inspections and for the cost to obtain bids must be paid from administrative funds and are not an allowable program cost.
