The purpose of this GIS is to advise local social services districts that the eDRS Web Service Application match has now gone live and changes to the application clearance process have been implemented. The web service identifies disqualified recipient information on the eDRS database for previously imposed SNAP intentional Program Violation (IPV) sanctions. As described in GIS 15 TA/DC044, a new indicator is now incorporated into the clearance report, and new screens displaying the match results are now active.

15-LCM-19, released on October 30th, provides additional guidance and includes a user guide that describes the match requirements and how to navigate the new WMS screens.
