

APPENDIX H

REDE INFORMATION AND FILE FORMATS

In support of Electronic Benefit Transfer (EBT) implementation, the Food and Nutrition Service (FNS) determined that an automated process was required to notify the EBT Processors, contracted by each state (and possibly by each county), of any changes to the data for the Supplemental Nutrition Assistance Program (SNAP) Retailers to which they provide service.

FNS has established requirements that the automated process will:

- A. **Provide Detailed State Retailer Data for State EBT Processors.** FNS will provide a file of data for each Retailer within a state to EBT processors. An EBT processor may request a file for multiple states. Changes to this Retailer file, which contains additions and deletions of Retailers, as well as changes to the basic information, will be provided on a daily basis, Monday through Friday. A full file of the Retailer data for each state will be provided on a monthly basis. This full file will allow the EBT processor to verify that no Retailer changes have been missed.
- B. **Provide National Retailer Data for Interoperability Between States.** FNS will initially provide, to each EBT processor, a file of limited data for each authorized Retailer in the SNAP. This file will be used to allow for the inter-operability between states and EBT processors for the EBT redemption process. Changes to this file (additions and deletions of Retailers) will be provided on a daily basis, Monday through Friday. A complete file of the limited Retailer data for the entire SNAP will be provided on a monthly basis. The complete file will allow the EBT processor to verify that no Retailer changes have been missed.

The Retailer Electronic Data Exchange (REDE) interface was developed to facilitate the exchange of Retailer data between FNS and the EBT processors. REDE replaced the manual process which required a field office to fax the changes for a store to the EBT processor. It has helped to reduce the EBT processors' submission of incorrect authorization numbers with redemption data which must then be manually researched by FNS staff at the Benefit Redemption Systems Branch (BRSB), and at FNS regional offices and field offices. It can also be made available to Third Party Processors to limit input errors.

The most critical exchange is FNS' notification of EBT processors concerning newly authorized EBT Retailers and EBT Retailers who have been withdrawn or disqualified as participants in the SNAP. The EBT processor is responsible for promptly setting up a newly authorized EBT Retailer to participate in the EBT redemption process, generally within 2 weeks of this notification. The EBT processor is also responsible for removing a withdrawn or disqualified Retailer from the EBT redemption process within 2 days of notification from FNS.

The REDE Subsystem supports Interoperability, which allows a SNAP Recipient from one state's program to make EBT purchases in another state. Interoperability is supported through the notification of all EBT processors concerning changes in any SNAP Retailer's authorization status. The REDE Subsystem provides this data not only to the state and/or county EBT processors, but also to organizations that may provide Gateway Services to multiple EBT processors and/or to any other FNS-approved organizations. The data provided on each store authorized to accept SNAP EBT transactions is limited to only that

data which allows the basic identification of the store as an authorized Retailer.

Operations

REDE processing includes standard (regularly scheduled) nightly and monthly operations and ad hoc operations. Both types of REDE operations are performed at the Benefit Redemption Systems Branch (BRSB) in Minneapolis, MN. The standard nightly operations are performed nightly, Monday through Friday, and create the state and national Retailer data update files. The standard monthly operations are performed monthly (on the first Saturday of the calendar month) and create the full state and national Retailer data files. The state Retailer data update files are used to update the Retailer EBT Data Exchange (REDE) database. Ad hoc operations are performed as requested when a State Agency and/or EBT processor requests a start-up copy of a state or national Retailer update file.

The REDE Subsystem will create state Retailer data update files and a national Retailer data update file on a nightly basis, Monday through Friday. The exceptions to this are federal holidays that fall on a weekday. A full state Retailer data file and national data file, which contain authorized stores, will be created on a monthly basis during the first full weekend of a calendar month. These files will be readied for transmission to authorized Recipients of each state's file and the national file who will be given the choice of accessing these files using either a Connect Direct process through the USDA Computer Center in Kansas City or a VPN internet solution.

Creating State Retailer Data Update Files

Each night, the REDE Subsystem will utilize the current and prior night's Retailer Extract File to create the state Retailer data update files for those states that the State Agencies and/or EBT processors have included in a file of requested states. The state Retailer data update files contain the Retailer data update transactions for each state's Retailers. These transactions identify when a Retailer has been added to, removed from, or re-activated into the Supplemental Nutrition Assistance Program and identify if certain key Retailer data has changed. If a state incurs no changes to its Retailers' data, a file will still be created for that state and will contain a header record and trailer record which identify that no detail records were included in the file. The creation of a file for each of the requested states will improve security and integrity as the authorized data files Recipients from each state will always get a file, even when it does not contain any updates.

Creating National Retailer Data Update Files

The national Retailer data update files are also created by REDE on a nightly basis and will be readied for access in the same manner as the state Retailer data update files. Each file will identify if a Retailer has been removed from, or added to, the set of Retailers authorized to perform EBT processing for the SNAP. While additions and deletions are the primary types of transactions, there is also a modify transaction that identifies whether the first ten characters of the Retailer name have changed, or whether the state within which the Retailer resides, has been changed or whether the business type has been changed. Ideally, the state change should occur only if someone mis-keys the information into the primary Retailer database and then later corrects it.

The national Retailer update file may be sent to entities other than the state EBT processors; for example, it may also be provided to some independent processors that support a national EBT Retailer database for the state EBT processors. As with the state file, if there are no changes to any Retailers in the nation, a file containing a header record and a trailer record will be created which identify that no detail records were included in the file. This will ensure that all authorized Recipients are aware that there were no changes to the nation's Retailers for that period.

Creating Full State and National Retailer Data Files

On a monthly basis, the REDE Subsystem will create a full file of all of the state Retailer data files and the national Retailer data file using the most current Retailer Extract File. These files will be readied for access in the same manner as the update files. The primary purpose of these files is to ensure that updates have not been missed and that all updates were received by the authorized Recipients of each file.

Creation of Start-up State and National Retailer Data Files

When requested by a newly implemented EBT state or that state's EBT processor, the REDE Subsystem will create a set of start-up files consisting of a full state Retailer data file and/or full national Retailer data file. The files will be created using the most current Retailer Extract File and will be readied for access in the same manner as the standard monthly files. These start-up files are provided for a state and an EBT processor to use when the state's EBT implementation does not coincide with the creation and transmission of the standard monthly Full State Retailer Data Files and National Retailer Data File.

Additional Information

1. A modify transaction will contain all of the current data for a Retailer. It does not **just** identify the elements that have changed.
2. The Zip 4 Code field will contain zeroes if the zip code is unknown.
3. If the Retailer's mailing address is the same as the location address, the mailing address's character type fields will contain spaces and its numeric type fields will contain zeros. There are some Retailers in the file, however, where the same information is reflected in both fields.
4. The monthly file will contain one add transaction for each authorized Retailer within the state that is in the STARS database. An authorized Retailer will have an authorization status code of '01' (Authorized). It does not contain de-authorized Retailers that have an authorization status code of '03' (Withdrawn) or '04' (Disqualified) or '07' (Permanently Disqualified) or '10' (Permanently Withdrawn).
5. There are a few Retailers that do not have a street address. This is a valid situation in certain cases. For instance, it is possible that the store is not on a street. Such as on an Indian Reservation.
6. Retailers that are involuntarily removed from SNAP will be given a five-day grace period after the effective date until the removal is reflected in the REDE files. This grace period potentially allows for any appeals of the removal. The exception to this grace period is for the permanent disqualification (Authorization code of '07') where there is no suspension of the disqualification pending the outcome of an appeal.
7. Retailers that have been added to STARS as a new Retailer, with an open date in the future, **will be** sent in the daily State Update File as soon as they are entered into STARS. This differs from the National Update File where future dated stores **will not be** included in the daily National Update File **until 3 days prior to the effective date.**
