1. A TA funded PNA is not provided to residents of publicly-operated facilities. This PNA is provided to each person in the family and only applies when the facility provides 3 meals a day.

2. A State-administered \$25 State Supplemental Personal Needs Allowance (SSPNA) benefit is provided only to SSI recipients living in nursing homes. A \$5 SSPNA benefit is provided to SSI recipients living in all other medical facilities.

3. Residents of such facilities can only qualify for SSI, or Medicaid and the MA-only PNA, if they are under age 21 or age 65 or older.

4. Since these programs do not get Federal Medicaid, an SSI recipient in a privately operated facility would receive the SSI living alone benefit.

5. A PNA is provided only when the individual has been determined to be permanently absent from his/her home. When the individual is not permanently absent, an MA-only recipient is budgeted as though he or she is temporarily absent from his or her residence.

6. An MA-only recipient is budgeted as though he or she is temporarily absent from his or her residence.

7. Income deduction for Medicaid-only.
