

STRENGTHENS PARENTING SKILLS!

Children don't come with a manual. Home visitors provide assistance with and answer questions about things like breastfeeding support (i.e. connecting to a lactation specialist) and safe sleep practices.

CONNECTION WITH COMMUNITY RESOURCES!

Home visitors connect families with organizations in the community and direct resources, such as nutrition information (SNAP/WIC), mental health supports, early intervention (EI) services, health insurance information, and basic need/ educational supplies such as diapers, formula, toys, and books.

AN ADVOCATE, A PARTNER, A FRIEND!

Parenting is one tough job. Home visitors understand the importance of partnership and are trained to support YOU!

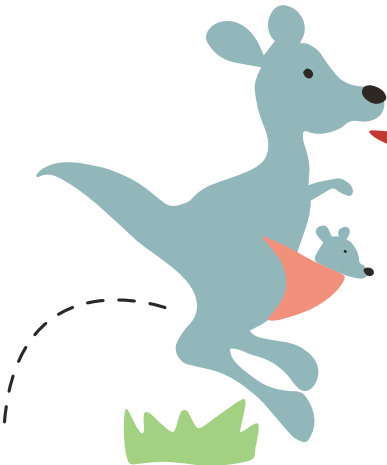

Let's Talk ABOUT HOME VISITING BENEFITS

INCLUSIVE!

You are the expert of your own life. Home visiting connects you to a larger, inclusive community where you belong and your voice matters.

NURTURE CHILD DEVELOPMENT!

MINDFUL OF RACIAL INEQUITIES!

Home visitors acknowledge and honor lived experience, including those who face injustices based on race and from other parts of your identity. Programs are committed to removing those obstacles and home visitors can help families navigate through their barriers.
