<b>Attachments:</b>	<a href="#">Attachment 1: NYDocSubmit Quick Reference Card (Rev.5/22)</a>

### Section 2

The purpose of this general information system (GIS) message is to inform social services districts (districts) of the deployment of Release 1.6.1 of the NYDocSubmit mobile application (Application) on May 12, 2022. Districts were previously informed of the availability of the Application in [19 ADM-07](#) (Phase I districts) and [20-ADM-04](#) (Phase 2 districts).

This release adds Italian and Polish to the supported Application languages. With the deployment of Release 1.6.1, the Application will be available in: English, Spanish, Arabic, Bengali, Chinese (Traditional), Haitian Creole, Korean, Russian, Yiddish, Italian and Polish. An individual may select their preferred language from these options before logging into the Application. If the individual does not select a language before logging into the Application and the language set on their mobile device is not an available Application language, the Application will default to English. However, the language may be changed at any time to one of the languages identified above through the menu that is available in the left corner of the screen.

Districts are reminded that individuals must use the latest version of the Application to successfully upload documents to a participating district. Individuals with “auto update” enabled on their mobile device should automatically receive Release 1.6.1. After signing into the Application, individuals who do not have “auto update” enabled and have an earlier version of the Application on their mobile device will be offered the opportunity to visit the mobile app store and update the Application. They will need to download and use the latest version of the Application to successfully transmit a document to a participating district.

The GIS also transmits the NYDocSubmit Quick Reference Card (QRC) which has been updated to add Italian and Polish to the list of available languages. Districts that have implemented the Application are encouraged to distribute the updated NYDocSubmit QRC to relevant staff.
