
2004 Statistical Report to the Legislature on the Operations of New York State Temporary Assistance Programs

Contributing Agencies:

- New York State Office of Temporary and Disability Assistance
- New York State Department of Labor
- New York State Department of Health

***This report was prepared in fulfillment of the requirements of Section 149
Part B of Chapter 436 of the Laws of 1997.***

2004 Statistical Report On the Operations of New York State Temporary Assistance Programs

Introduction and Summary

This report was prepared in fulfillment of the reporting requirements contained in the Welfare Reform Act of 1997, and was compiled by the Office of Temporary and Disability Assistance (OTDA) with data developed by OTDA, the Department of Labor (DOL) and the Department of Health (DOH).¹ Although the law only requires that reporting should begin upon the completion of the redesign of the Welfare Management System and the completion of the Welfare-to-Work Caseload Management System, recent improvements in our data infrastructure, including the continued development of the Welfare Reporting and Tracking System, allow us to report on a large proportion of the required data using currently available sources. As our data structure continues to improve, we will increase both the quality and quantity of our reporting.

In order to allow sufficient time to develop data and coordinate the report among the contributing agencies, the time period covered in most of this report's sections cover the period of July 2003 through June 2004 (referred to as the report year). Due to the fact that data on work activities are derived from data samples produced for federal reporting, such data cover the last available federal fiscal year.

What follows is a brief summary of current trends in the Temporary Assistance caseload for the July 2003 to June 2004 time period, and a high level summary of the data supplied in the main body of the report.

Recent Caseload Trends

Figure 1 illustrates the trend in total Temporary Assistance (TA) recipients for the July 2003 to June 2004 period. During this time, the total recipient count increased by 24,858 or 4%, starting at 615,099 and ending at 634,873. This outcome is in contrast to the last report period, which had a net increase of 95 recipients over the course of the year. The flat caseload observed in this previous period had signaled the end of the long-term downward trend that began in 1994.

**Figure 1: New York State Temporary Assistance Recipients
July 2003 to June 2004**

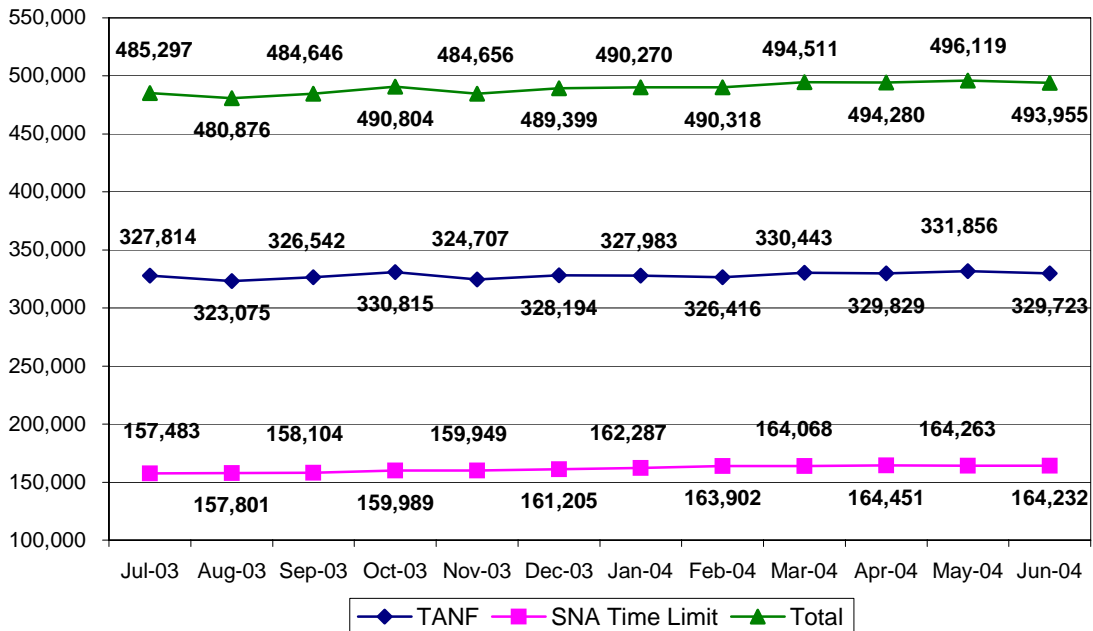

Figure 2 shows the recipient count change for the same period for “family” cases, which consist of two components: 1) recipients in the Temporary Assistance to Needy Families (TANF) program (which in turn consists of Family Assistance (FA) and a small number of federally funded Safety Net Assistance (SNA) families where an adult in the case is mandated to drug treatment), and 2) former TANF cases in the SNA program by virtue of exceeding the TANF 60 month time limit. Figure 2 also illustrates the change in the number of recipients in each of these component categories.

**Figure 2: Recipients in Family (TANF and SNA Time Limit) Cases
July 2003 to June 2004**

There was a 8,658 or 2% increase in the number of recipients in the family case category. This increase was the result of a 1,909 or 1% recipient increase in TANF, and a 6,749 or 4% recipient increase in the SNA time limit category. Note that by describing the overall recipient count in family cases as a net of TANF and time limit case type changes we do not mean to imply that the dynamic of those caseloads is summed up by movement from TANF to the time limited category or to closed status. In fact, the pattern of recipient movement between case types and closed status is very complex, with recipients constantly exiting and entering the various case types to and from closed status, and moving back and forth across case types (i.e., recipients not only move from TANF to time limited status, but also move in the opposite direction as case composition changes or persons obtain time limit exemptions).

Figure 3 shows the recipient count for “traditional” Safety Net Assistance (SNA) cases, usually referred to as “singles” cases since they consist primarily of one-person adult cases.ⁱⁱ The number of recipients in these cases increased by 11,116 or 9% from 128,802 to 140,918, an increase similar to the one observed last year in this category

**Figure 3: Recipients in Singles (SNA Non Time Limit) Cases
July 2003 to June 2004**

Report Summary

This summary, and the report as a whole, is organized by section headings that refer directly by letter to the subsections of the reporting requirements in statute. In some cases, reporting requirements for a particular section overlap with those in other sections. In these cases, appropriate cross-references will be provided in the body of the report.

Section a: Applications

Section a provides district level and statewide information on the number of applications approved, withdrawn and denied, and the reasons for denials, for TA as a whole and for the FA and SNA categories. These numbers are summarized in Table 1. Of all applications processed, 47.5% were approved, 25.8% were withdrawn and 26.7% were denied. These rates were very similar for the FA and SNA categories.ⁱⁱⁱ

**Table 1: Applications Approved, Withdrawn and Denied
July 2003 to June 2004**

	Applications Approved	Applications Withdrawn	Applications Denied
Total Temporary Assistance	337,084	182,944	189,382
Family Assistance	120,452	64,697	67,757
Safety Net Assistance	216,632	118,247	121,625

The main reasons for application denials were failure to comply with application requirements, either employment-related requirements (11,494 or 6%) or other requirements, such as failure to appear for interviews or failure to provide documentation (87,173 or 46%). Denials related to financial issues (income and resources) totaled 23,933, or 13% of denials. A large number of denials (61,706 or 33%) fell into a miscellaneous “other” category. Most of the denial codes in this category fail to identify a clear reason for the denial, since the code used requires the caseworker to manually write in a close reason. Other denials in this category include failure to locate the recipient, and cases where TA is denied but emergency assistance is provided.

Section b: Case Closings and Transfers

Section b provides district level and statewide information on the number of case closings, and closing counts by reason for closing, for TA as a whole and for the FA and SNA categories. It also provides district level and statewide information on transfers between the FA and SNA case categories that occurred during the year.

Case closings totaled 331,157 for TA, 114,086 for FA and 217,071 for SNA. Overall, the most common reasons for case closings were failure to comply with program requirements not related to employment (143,754 or 44% - this category includes closings due to failure to recertify), financial issues (63,010 or 20%) and failure to comply with employment requirements (51,901 or 16%). As with the case denials, a large number of closings fell into the “other” category, mostly situations where the reason for closing was not clearly defined in the closing code. The “other” category constituted 31,006 or 9% of closings.

Transfers from SNA to FA totaled 6,943 for the report year. Such transfers can occur for many reasons, including when an adult in an SNA case has a child, a time limited SNA case receives a time limit exemption, or an adult whose cash assistance count causes the case to be time limited leaves the household. Transfers in the opposite direction - from FA to SNA - totaled 21,477. While a substantial portion of these cases move from FA to SNA due to time limits, there are other reasons these transfers occur, and the current count is substantially below the 58,886 such transfers reported in 2002, early after the onset of time limits.

Sections c, d and e: Subsidized Work Activities, Unsubsidized Work Activities and Training and Educational Activities

These work activities sections are provided by the Department of Labor, and are based on Federal Fiscal Year (FFY) 2002-2003 Temporary Assistance to Needy Families (TANF) and Separate State Program Maintenance of Effort (SSP-MOE) quarterly disaggregated data reports.^{iv} These reports contain detailed data on separate monthly samples of TANF and SSP-MOE cases, and are submitted by New York State to the US Department of Health and Human Services.

Section c provides statewide TANF and SSP-MOE data on the average monthly number of recipients participating in work activities, the number of recipients receiving an exemption from participating in work activities or disregarded in the calculation of the federal work participation

rate, the type of work activities engaged in and the hours of work engaged in per week. Section c also contains data on expenditures in support of work activities for the same FFY.

Section d contains sample-derived data on the number of TANF and SSP-MOE recipients in unsubsidized employment, and Section e contains similar data on the number of recipients in various education and training activities, and hours per week in such activities.

The sample data show an estimated monthly average of 12,200 TANF recipients and 5,500 SSP-MOE recipients in work activities (including subsidized public and private sector employment, work experience, on the job training, job search/job readiness training and community service activities). The average hours of participation per week in these work activities were 29.5 and 31.9 for the TANF and SSP-MOE recipients, respectively. Also, an estimated monthly average of 16,200 TANF recipients and 16,200 SSP-MOE recipients participated in unsubsidized employment, and an estimated monthly average of 5,600 TANF recipients and 2,200 SSP-MOE recipients participated in training or educational activities (including vocational education, job skills training, employment related education and school attendance). The average number of hours per week participants spent in education and training activities was 30.7 and 32.9 hours for TANF and SSP-MOE cases, respectively.

Federal, state and local expenditures in support of work activities totaled \$ 559,890,688 for the October 2002 to September 2003 period.

Details regarding the calculation and interpretation of the sample-derived figures are contained in the body of the report, so readers are referred there for a full explanation of the reported figures, including confidence intervals around the reported estimates and definitions of the activities included in the participation figures.

Section f: Sanctions

Section f provides statewide and district level data on the number and type of sanctions in TANF, SNA MOE (time limited) and SNA Non-MOE cases.^v These data are provided for four representative months in the year, September and December 2003, and March and June 2004 (i.e., the months ending each calendar quarter). The quarterly data indicate that for the report year around 24,000 individuals were in sanction status in a given month. Using the most recent (June 2004) data, we see that there were 24,954 persons in sanction status, which represents 9% of the approximately 268,700 adults on assistance at the time. Most (21,800 or 87%) of these sanctioned persons had an employment-related sanction.

Section f also provides district level and statewide data on the number of sanction-related fair hearings requested, the number of hearings held, and the outcomes of these hearings, for the full report year.^{vi} These data are reported separately for total TA, FA and SNA cases. Readers of this section should note that the numbers reported are based on issues addressed, not hearings per se: more than one issue can be addressed at a hearing, and separate issues addressed at the same hearing can have different outcomes.

For the purposes of economy of presentation, Section f also contains fair hearings data on work related issues, since these overlap with sanction-related hearings and follow a similar format. Also included in this section are data on the number and outcomes of administrative disqualification hearings, i.e., hearings initiated by districts.

Due to the large number of issues addressed in the fair hearings section, they will not be summarized here. Readers should note, however, that outcome numbers will not sum exactly to hearing numbers since some issues initiated during the report year may still have been pending at the end of the report year.

Section g: Closings

All data available to meet the requirements of this section were presented in Section b, except for data on transitional Medicaid receipt. Here we report statewide and district level data on the percentage of persons from closed "family" cases (TANF or SNA time limited cases) that were Medicaid eligible in the fourth month following case closing, in the situation where those persons have not returned to assistance. We report data for two time periods in the report year, the final quarter (October to December) of 2003 and the second quarter (April to June of 2004). For the state as a whole, we find about 56% percent of persons closed in these case types are Medicaid eligible four months later. There is substantial district variation on this measure, with many districts showing very high rates of Medicaid eligibility after closing.

Section h: Substance Abuse Treatment Programs

The Department of Health reports that there is no data available for the programs covered in this section for the July 2003 to June 2004 period.

Section i: Pregnancy Prevention Programs

In Section i the Department of Health reports on participants in TANF funded family planning programs, the Comprehensive Family Planning and Reproductive Health Program and the Community Based Adolescent Pregnancy Prevention Program (CBAPP). The outreach and education portions of these programs served 144,386 participants, and 183,733 participants received at least one of the services provided under these programs. A detailed description of these programs is included in the body of the report, along with district level data on the number of clients receiving any service provided by the programs.

Section j: Disabled and Work-Limited Recipients

Using data from the TANF and SSP-MOE disaggregated samples, the Department of Labor estimates that a monthly average of 17,400 TANF recipients and 6,000 SSP-MOE recipients are exempt from participating in work activities.

Section k: Food Assistance Program

Section k provides district level and statewide data on the number of households and persons served in the Food Assistance Program (FAP), and the value of benefits provided by the program. It also reports data on fair hearings related to FAP and the related outcomes. Although this section of the statute contains extensive reporting requirements, most of them became inappropriate when in 1998 Congress restored eligibility for standard Food Stamps to most participants in the original FAP program. Also, the Food Stamp Reauthorization Act of 2002 restored standard Food Stamp eligibility to virtually all of the few remaining participants in FAP, effective March 2003. Currently, to be found eligible for FAP, an individual would need to be identified as a victim of domestic violence not otherwise eligible for federal Food Stamps or currently be over 60 years of age, but not have been 65 years of age on August 22, 1996, and meet certain other specific and very limited criteria.

At the outset of the year, there were only 8 households and 10 persons in FAP. By March 2004 there were no cases left in FAP.

Section l: Domestic Violence

Section l reports district level and statewide data for the report year on the number of persons indicating a current danger on their domestic violence screening form, the number of persons whose domestic violence assessments showed a credible threat, the number of persons with a waiver from program requirements as a result of domestic violence, and the number of persons

with new waivers granted during the year. Also reported is the number of active waivers broken down by the program requirements that are waived (e.g., time limits, employment, IV-D, etc.), as well as the average duration of waivers by waiver type.

For the reporting period, 9,360 persons checked that there was a current domestic violence danger to them on the screening form. During the same period, 5,162 persons underwent a full domestic violence assessment where a credible threat was confirmed,^{vii} and 4,585 waivers were granted. Waivers active during the period averaged 4 months in duration.

For the report period, 6,009 persons had domestic violence waivers, including persons whose waivers were granted previous to the report year. These persons had a total of 10,384 active waivers during the report year. The number of waivers exceeds the number of persons with waivers because waivers are specific to the requirement for which the waiver is granted, not a blanket exception from all program requirements. That is, a single domestic violence victim can have more than one waiver, say for instance if the person is exempted from both child support and work requirements. Note also that the number of active waivers for the year, like the number of persons with active waivers, includes those carried over from previous years.

Most domestic violence waivers were granted either from the requirement to cooperate in the establishment of child support (5,405), or from the requirement to participate in employment activities (4,632).

ENDNOTES

ⁱ The reporting provisions are codified in §149, Part B of Chapter 436 of the laws of 1997. The full text of §149 is reproduced at the end of the report.

ⁱⁱ For various programmatic reasons, there are also a small number of cases with children in the portion of the SNA caseload that has not timed out from TANF. These cases are part of the analysis of the “singles” caseload, but are a very small portion of that caseload.

ⁱⁱⁱ Note that the number of withdrawals reported this year is dramatically larger than the 57,259 reported last year. This is due to a one-time correction to the data source used to assess application activity (WRTS), in the form of a purge of old applications no longer pending on the Welfare Management System (WMS), where applications are processed. This correction was required because a failed link between WMS and WRTS prevented WRTS from registering a category of automated application withdrawals, and over a period of years these had built up in WRTS. Had these withdrawals been registering as they occurred, previously reported withdrawal counts would have been somewhat higher.

^{iv} As mentioned above, in New York State the TANF program consists primarily of FA cases, but also includes a relatively small number of SNA family cases who have their grants restricted because they are mandated into substance abuse treatment. These substance abuse cases are referred to as SNA-FP cases, since they are, like the FA cases, partially federally financed. The SSP-MOE cases are primarily SNA cases that would be TANF eligible except that they have exceeded the State 60 month time limit, but also include a relatively small number of cases that would be TANF eligible except that they contain a qualified alien barred from the receipt of TANF.

^v In previous reports, sanctions were broken down by the FA and SNA categories used elsewhere in the report. For this report, we have switched to reporting by the TANF, SNA MOE (time limit and qualified alien) and SNA Non-MOE (“singles”) categories. This change was made to reflect the fact that sanction policy varies significantly between the two latter categories, even though they are both classified as SNA.

^{vi} Fair hearings outcomes described in the report are issues affirmed (i.e., the agency’s determination is deemed correct), issues reversed (i.e., where the agency’s determination is incorrect), issues withdrawn, issues correct when made (i.e., where the agency was correct at the time the decision was made, but changes in circumstances require agency action in favor of the client) and a catch-all “other” category.

^{vii} Note that the that the percentage of domestic violence interviews that result in a credible threat cannot be determined by taking the ratio of interviews that result in a credible threat to the number of persons indicating a current danger. This is because most of the difference between the number indicating a threat and the number where a credible threat was found, is due to the client electing not to proceed to the interview stage.

6. Hours of Work per Week <u>7</u>	29.5	± 0.5	28.5	30.5
* Due to the small sample size, the standard error and confidence limits were not computed.				

General Comments:

The figures presented on these tables are based on Federal Fiscal Year 2003 data from the TANF quarterly reports submitted by New York State. These data exclude TANF cases that transitioned into SSP-MOE after Dec. 2001 due to reaching the Federal time limit. Data for SSP-MOE cases are presented in a separate table. Participation rates, characteristics and financial circumstances from these submittals have been released by the U.S. Department of Health and Human Services/Administration for Children and Families (HHS/ACF).

The data published in this report reflect all individuals engaged in work activities, regardless of the number of hours in these activities, rather than cases meeting the more restrictive participation criteria, as published by the HHS/ACF. Sample results for each month were inflated to reflect the universe of TANF cases as reported in Section 3 of the TANF quarterly report. For the count of each individual activity/transaction/characteristic appearing in this report, we followed the Federal methodology that averages monthly data to obtain fiscal year figures.

See Footnotes

2004 STATISTICAL REPORT ON THE OPERATIONS OF NYS TEMPORARY ASSISTANCE PROGRAMS

Data Related to Work Activities Subsidized or Otherwise Sponsored

Footnotes:

- \1 Average monthly number of TANF participants in subsidized work activities (subsidized private and public employment, and on-the-job training), work experience, job search/job readiness training, community service program, or providing child care services to an individual who is participating in a community service program. Recipients may be participating in more than one work activity. Subsidized work activities are not the only activities that count toward federal participation rate requirements. Additional activities can be found in Sections 149.2.d and 149.2.e.
- \2 Average monthly number of disabled individuals who are exempt from participating in work activities. Under Section 332-b of the Social Services Law, disabled individuals who are determined to be unable to engage in work activities are exempt in New York from participating in work activities. Despite this exemption, the TANF family is included in the calculation of the participation rate.
- \3 Average monthly number of individuals exempt from participating in work activities for other reasons. These data reflect recipients who are exempt from participating in work activities due to age, caring for a disabled family member in the home, being a victim of domestic violence, and VESID involvement. Despite this exemption, the TANF family is included in the calculation of the participation rate.
- \4 Average number of one-parent cases that have a child less than 1 year old who are disregarded from the participation rate calculation. Single custodial parents, or caretakers with a child under 12 months of age, who have not been required to participate are disregarded from the rate. The TANF family is thus excluded from the calculation of the participation rate. This disregard is limited to 12 months total during the 60 months lifetime limit.
- \5 Average monthly number of sanctioned individuals who are disregarded from the participation rate calculation. These data reflect recipients that are required to participate, but have been sanctioned for not participating. The cases in which these individuals are included are disregarded from the participation rate calculation as a result of being sanctioned during the reporting month, unless the case meets the required participation rate hours. These cases may be excluded from the calculation of the participation rate for up to 3 months during the preceding 12 month period.
- \6 Average monthly number of TANF participants in subsidized/sponsored work activities by activity.
- \7 Average number of hours of participation per week per TANF participant in subsidized/sponsored work activities.

* **Note:** The **standard error**, or standard deviation, of a sample estimate indicates how close the sample estimate comes to the corresponding unknown measurement for the entire population. The standard error of a sample estimate gives us the precision, that is, the range in which the true population value most likely falls. The true population value is expected to lie between these limits. The confidence levels give us the likelihood or probability that it will fall within that range, that is, the assurance that the true value would fall in this range. A 95% confidence level tells us that if we pick 100 similar samples from the population, the sample estimate would fall within approximately plus or minus 2 standard errors of the true value in 95 of those samples. (These are referred to as the upper and lower confidence limits.)

For example, the annual average of the number of TANF recipients found to be exempt due to a disability is 17,400 with an approximate standard error of 900. The approximate lower confidence limit is $17,400 - (2)(900) = 15,600$, and the corresponding upper confidence limit is $17,400 + (2)(900) = 19,200$. While it is not likely that the true population value is exactly 17,400 (the value based on the sample), we are 95% confident that the true population value is between 15,600 and 19,200.

The standard errors of the number of participants possessing a given characteristic, e.g. engaged in a certain type of work activity, were obtained by calculating the standard error of the proportion of those individuals in the sample. The proportions were then applied to the total population of the TANF cases. Therefore, the result is a measure of the number of participants with a given characteristic in the entire population.

The results obtained were based on monthly stratified samples and the stratification process varied, thus the results are approximate. Stratification is a statistical process in which the total population is divided into mutually exclusive subpopulations, prior to sampling. This process was required by the federal government in order to better gauge the characteristics of the subpopulations.

2004 STATISTICAL REPORT ON THE OPERATIONS OF NYS TEMPORARY ASSISTANCE PROGRAMS

Data Related to Work Activities Subsidized or Otherwise Sponsored

Footnotes:

- 1 Average monthly number of SSP-MOE participants in subsidized work activities (subsidized private and public employment, and on-the-job training), work experience, job search/job readiness training, community service program, or providing child care services to an individual who is participating in a community service program. Recipients may be participating in more than one work activity. Subsidized work activities are not the only activities that count toward federal participation rate requirements. Additional activities can be found in Sections 149.2.d and 149.2.e.
- 2 Average monthly number of disabled individuals who are exempt from participating in work activities. Under Section 332-b of the Social Services Law, disabled individuals who are determined to be unable to engage in work activities are exempt in New York from participating in work activities. Despite this exemption, the SSP-MOE family is included in the calculation of the participation rate.
- 3 Average monthly number of individuals exempt from participating in work activities for other reasons. These data reflect recipients who are exempt from participating in work activities due to age, caring for a disabled family member in the home, being a victim of domestic violence, and VESID involvement. Despite this exemption, the SSP-MOE family is included in the calculation of the participation rate.
- 4 Average number of one-parent cases that have a child less than 1 year old who are disregarded from the participation rate calculation. Single custodial parents, or caretakers with a child under 12 months of age, who have not been required to participate are disregarded from the rate. The SSP-MOE family is thus excluded from the calculation of the participation rate. This disregard is limited to 12 months total during the 60 months lifetime limit.
- 5 Average monthly number of sanctioned individuals who are disregarded from the participation rate calculation. These data reflect recipients that are required to participate, but have been sanctioned for not participating. The cases in which these individuals are included are disregarded from the participation rate calculation as a result of being sanctioned during the reporting month, unless the case meets the required participation rate hours. These cases may be excluded from the calculation of the participation rate for up to 3 months during the preceding 12 month period.
- 6 Average monthly number of SSP-MOE participants in subsidized/sponsored work activities by activity.
- 7 Average number of hours of participation per week per SSP-MOE participant in subsidized/sponsored work activities.

* **Note:** The **standard error**, or standard deviation, of a sample estimate indicates how close the sample estimate comes to the corresponding unknown measurement for the entire population. The standard error of a sample estimate gives us the precision, that is, the range in which the true population value most likely falls. The true population value is expected to lie between these limits. The confidence levels give us the likelihood or probability that it will fall within that range, that is, the assurance that the true value would fall in this range. A 95% confidence level tells us that if we pick 100 similar samples from the population, the sample estimate would fall within approximately plus or minus 2 standard errors of the true value in 95 of those samples. (These are referred to as the upper and lower confidence limits.)

For example, the annual average of the number of SSP-MOE recipients found to be exempt due to a disability is 6,000 with an approximate standard error of 400. The approximate lower confidence limit is $6,000 - (2)(400) = 5,200$, and the corresponding upper confidence limit is $6,000 + (2)(400) = 6,800$. While it is not likely that the true population value is exactly 6,000 (the value based on the sample), we are 95% confident that the true population value is between 5,200 and 6,800.

The standard errors of the number of participants possessing a given characteristic, e.g. engaged in a certain type of work activity, were obtained by calculating the standard error of the proportion of those individuals in the sample. The proportions were then applied to the total population of the SSP-MOE cases. Therefore, the result is a measure of the number of participants with a given characteristic in the entire population.

The results obtained were based on monthly stratified samples and the stratification process varied, thus the results are approximate. Stratification is a statistical process in which the total population is divided into mutually exclusive subpopulations, prior to sampling. This process was required by the federal government in order to better gauge the characteristics of the subpopulations.

2004 STATISTICAL REPORT ON THE OPERATIONS OF NYS TEMPORARY ASSISTANCE PROGRAMS

C. Expenditures in Support of Work Activities

Work Activities
October 2002 through September 2003

	<u>FEDERAL</u>	<u>STATE</u>	<u>LOCAL</u>	<u>TOTAL</u>
Family Assistance (TANF - 265 Fund)	\$ 244,832,121	\$ 42,395,423	\$ 27,975,169	\$ 315,202,713
Safety Net	0	11,749,394	10,189,486	21,938,880
FSET (Food Stamp - 261 Fund)	67,420,692	26,823,326	47,432,643	141,676,661
Welfare to Work Block Grant	<u>55,514,171</u>	<u>12,388,195</u>	<u>13,170,068</u>	<u>81,072,434</u>
TOTAL	\$ 367,766,984	\$ 93,356,338	\$ 98,767,366	\$ 559,890,688

All of the activities supported by the expenditures shown in the chart above are designed to emphasize work and work preparation activities including basic education and post-secondary education.

The above expenditures cannot be distributed by county as several of the welfare employment programs are administered by providers who serve a multi-county geographic area.

	Annual Averages (10/02 - 9/03)	Approximate Standard Error	Approximate 95% Confidence Limits	
			Lower	Upper
D. Data related to Unsubsidized Work Activities				
1. No. of Recipients Hired <u>\8</u>	16,200	± 800	14,600	17,800

(Also see **General Comments** in the work activities table Section 149.2.c.)

\8 Average monthly number of TANF participants in unsubsidized employment. These data reflect active recipients with budgeted earned income or who have reported an entry to employment within the preceding 3 months and the income has not yet been budgeted. Unsubsidized employment is not the only activity that counts toward federal participation rate requirements. Additional activities can be found in Sections 149.2.c and 149.2.e.

*** Note:** The **standard error**, or standard deviation, of a sample estimate indicates how close the sample estimate comes to the corresponding unknown measurement for the entire population. The standard error of a sample estimate gives us the precision, that is, the range in which the true population value most likely falls. The true population value is expected to lie between these limits. The confidence levels give us the likelihood or probability that it will fall within that range, that is, the assurance that the true value would fall in this range. A 95% confidence level tells us that if we pick 100 similar samples from the population, the sample estimate would fall within approximately plus or minus 2 standard errors of the true value in 95 of those samples. (These are referred to as the upper and lower confidence limits.)

For example, the annual average of the number of TANF recipients found to be exempt due to a disability is 17,400 with an approximate standard error of 900. The approximate lower confidence limit is $17,400 - (2)(900) = 15,600$, and the corresponding upper confidence limit is $17,400 + (2)(900) = 19,200$. While it is not likely that the true population value is exactly 17,400 (the value based on the sample), we are 95% confident that the true population value is between 15,600 and 19,200.

The standard errors of the number of participants possessing a given characteristic, e.g. engaged in a certain type of work activity, were obtained by calculating the standard error of the proportion of those individuals in the sample. The proportions were then applied to the total population of TANF cases. Therefore, the result is a measure of the number of participants with a given characteristic in the entire population.

The results obtained were based on monthly stratified samples and the stratification process varied, thus the results are approximate. Stratification is a statistical process in which the total population is divided into mutually exclusive subpopulations, prior to sampling. This process was required by the federal government in order to better gauge the characteristics of the subpopulations.

Education Employment Related	200	*	*	*
School Attendance	200	*	*	*
3. Length of and Duration of Training or Educational Activities				
Hours per Week \10	30.7	± 0.5	29.7	31.7
* Due to the small sample size, the standard error and confidence limits were not computed.				

(Also see **General Comments** in the work activities table Section 149.2.c.)

\9 Average monthly number of TANF participants in education and training activities - total and by activity (vocational education, job skills training directly related to employment, education directly related to employment for individuals with no high school diploma or certificate of high school equivalency, or satisfactory school attendance for individuals with no high school diploma or certificate of high school equivalency). Training and educational activities are not the only activities that count toward federal participation rate requirements. Additional activities can be found in Sections 149.2.c and 149.2.d.

\10 Average number of hours of participation per week per TANF participant in education and training activities.

Note: The **standard error**, or standard deviation, of a sample estimate indicates how close the sample estimate comes to the corresponding unknown measurement for the entire population. The standard error of a sample estimate gives us the precision, that is, the range in which the true population value most likely falls. The true population value is expected to lie between these limits. The confidence levels give us the likelihood or probability that it will fall within that range, that is, the assurance that the true value would fall in this range. A 95% confidence level tells us that if we pick 100 similar samples from the population, the sample estimate would fall within approximately plus or minus 2 standard errors of the true value in 95 of those samples. (These are referred to as the upper and lower confidence limits.)

For example, the annual average of the number of TANF recipients found to be exempt due to a disability is 17,400 with an approximate standard error of 900. The approximate lower confidence limit is $17,400 - (2)(900) = 15,600$, and the corresponding upper confidence limit is $17,400 + (2)(900) = 19,200$. While it is not likely that the true population value is exactly 17,400 (the value based on the sample), we are 95% confident that the true population value is between 15,600 and 19,200.

The standard errors of the number of participants possessing a given characteristic, e.g. engaged in a certain type of work activity, were obtained by calculating the standard error of the proportion of those individuals in the sample. The proportions were then applied to the total population of TANF cases. Therefore, the result is a measure of the number of participants with a given characteristic in the entire population.

The results obtained were based on monthly stratified samples and the stratification process varied, thus the results are approximate. Stratification is a statistical process in which the total population is divided into mutually exclusive subpopulations, prior to sampling. This process was required by the federal government in order to better gauge the characteristics of the subpopulations.

2004 STATISTICAL REPORT ON THE OPERATIONS OF NYS TEMPORARY ASSISTANCE PROGRAMS

	Annual Averages (10/02 - 9/03)	Approximate Standard Error		Approximate 95% Confidence Limits	
				Lower	Upper
E. Data related to Recipient Training and Education Activities					
1. No. of Recipients in Training or Educational Activities by Type of Activity <u>\9</u>	2,200	±	200	1,800	2,600
Vocational Education	2,000	±	200	1,600	2,400
Job Skills Training	200		*	*	*
Education Employment Related	100		*	*	*
School Attendance	0		*	*	*
3. Length of and Duration of Training or Educational Activities					
Hours per Week <u>\10</u>	32.9	±	0.4	32.1	33.7
* Due to the small sample size, the standard error and confidence limits were not computed.					

(Also see **General Comments** in the work activities table Section 149.2.c.)

\9 Average monthly number of SSP-MOE participants in education and training activities - total and by activity (vocational education, job skills training directly related to employment, education directly related to employment for individuals with no high school diploma or certificate of high school equivalency, or satisfactory school attendance for individuals with no high school diploma or certificate of high school equivalency). Training and educational activities are not the only activities that count toward federal participation rate requirements. Additional activities can be found in Sections 149.2.c and 149.2.d.

\10 Average number of hours of participation per week per SSP-MOE participant in education and training activities.

* **Note:** The **standard error**, or standard deviation, of a sample estimate indicates how close the sample estimate comes to the corresponding unknown measurement for the entire population. The standard error of a sample estimate gives us the precision, that is, the range in which the true population value most likely falls. The true population value is expected to lie between these limits. The confidence levels give us the likelihood or probability that it will fall within that range, that is, the assurance that the true value would fall in this range. A 95% confidence level tells us that if we pick 100 similar samples from the population, the sample estimate would fall within approximately plus or minus 2 standard errors of the true value in 95 of those samples. (These are referred to as the upper and lower confidence limits.)

For example, the annual average of the number of SSP-MOE recipients found to be exempt due to a disability is 6,000 with an approximate standard error of 400. The approximate lower confidence limit is $6,000 - (2)(400) = 5,200$, and the corresponding upper confidence limit is $6,000 + (2)(400) = 6,800$. While it is not likely that the true population value is exactly 6,000 (the value based on the sample), we are 95% confident that the true population value is between 5,200 and 6,800.

The standard errors of the number of participants possessing a given characteristic, e.g. engaged in a certain type of work activity, were obtained by calculating the standard error of the proportion of those individuals in the sample. The proportions were then applied to the total population of SSP-MOE cases. Therefore, the result is a measure of the number of participants with a given characteristic in the entire population.

The results obtained were based on monthly stratified samples and the stratification process varied, thus the results are approximate. Stratification is a statistical process in which the total population is divided into mutually exclusive subpopulations, prior to sampling. This process was required by the federal government in order to better gauge the characteristics of the subpopulations.

E. Expenditures in Support of Training and Education Activities

All of the activities and associated expenditures for the welfare employment programs are designed to emphasize work and work preparation activities including basic education and post-secondary education. As such, please refer to Section 149.2.c "Expenditures in Support of Work Activities" for further information.

G. Data related to Case Closings.

Data available to meet the remaining requirements of this section were reported in Sections a, b, and f.

H. Data related to Substance Abuse Treatment Programs.

The Department of Health reports that there is no data available for the programs covered in this section for the July 2003 to June 2004 period.

2004 STATISTICAL REPORT ON THE OPERATIONS OF NYS TEMPORARY ASSISTANCE PROGRAMS

NEW YORK STATE DEPARTMENT OF HEALTH

Accomplishments of Family Planning and CBAPP Programs funded by
TANF Funds for the period July 2003 to June 2004

TANF funds have been utilized to significantly expand the Department of Health's Comprehensive Family Planning and Reproductive Health Program and the Community Based Adolescent Pregnancy Prevention Program (CBAPP). The Family Planning Program provides comprehensive family planning and reproductive health services including medical services, health education and outreach to low income, uninsured women. The CBAPP Program provides peer and parent education, youth development and outreach to high-risk adolescents.

Funding was provided to 59 family planning agencies that provide services in over 210 service sites. These providers used TANF funds to continue expanded outreach and education activities in community settings, including schools, to educate children and adults regarding reproductive health and to provide programs to prevent adolescent pregnancy. TANF funding has provided an opportunity to focus the expansion of the program on state and federal priorities including:

Provision of community education, public information and counseling to prevent adolescent pregnancy and increase access to clinic services for teens who are already sexually active

Increase outreach to women not likely to seek services, including traditionally under-served minorities and homeless and substance abusing women; and

Improved access in under-served areas to women and adolescents at risk for unintended pregnancy.

Health educators work in schools, in conjunction with community-based organizations, and other youth-serving organizations to provide education on issues such as contraception, abstinence, HIV/AIDS and sexually transmitted diseases. They participate in health fairs, organize community youth forums and parent-teen retreats, and outreach to high-risk populations. Each family planning agency has at least one full-time health educator on staff. Many of the larger agencies employ several educators. These educators provided more than 8,900 education and training sessions for adolescents and adults, and reached an audience of 144,386 individuals in the past year.

Audience	Sessions	Participants	% of Total Sessions	% of Total Participants
Youth (1-12)	379	5,817	4%	4%
Teens	3,810	53,925	43%	37%
Parents/Adults	3,306	61,106	37%	42%
Professionals	878	11,816	10%	8%
Families	530	11,722	6%	8%
Total	8,903	144,386	100%	99%

2004 STATISTICAL REPORT ON THE OPERATIONS OF NYS TEMPORARY ASSISTANCE PROGRAMS

NEW YORK STATE DEPARTMENT OF HEALTH

Accomplishments of Family Planning and CBAPP Programs funded by
TANF Funds for the period July 2003 to June 2004

These figures represent an additional 25 program sessions conducted compared to the previous year. While agencies reported increased requests for educational programs, it appears that fewer participants attended those sessions.

Despite a slight (2.5%) decrease in total clients, as well as in teen clients served, Family Planning Program providers continued their successful expanded outreach and education programs, expending all available TANF funds. The attached chart shows on a county-specific basis the 183,733 individuals served in the reporting period. The income level of the vast majority of these clients would indicate that they are eligible for TANF, and the remainder is needy. The Department is projecting that 19,461 pregnancies and 12,490 births have been averted among clients accessing family planning services in 2003. In both instances, this represents a nearly 9 percent increase over the 2002 projections. As a marker of program success, NYS was awarded bonus TANF dollars in the amount of \$25 million for a significant reduction in out-of-wedlock pregnancies. In combination with the funds saved from prevention of unintended pregnancies, which cost many thousands of dollars each to the state and federal governments for Medicaid prenatal and delivery costs, the TANF initiatives in family planning have more than repaid themselves in savings.

CCBAPP programs work with peers, schools, parents, community health and human service organizations, local governments, businesses and the media to reduce adolescent pregnancy in targeted high-risk communities. Twenty-three CBAPP contractors provide services in 54 high-risk areas in the state. Major program strategies include:

- Providing community information and education to sensitize the public about the local need to address the prevention of unintended pregnancy among adolescents;

- Promote abstinence and delay the onset of sexual activity among all adolescents;

- Expand educational, recreational and vocational opportunities for teens to provide alternatives to sexual activity and develop skills that can lead to higher earning power and reduce the need for public assistance; and,

- Provide access to comprehensive reproductive health care services to sexually active teens to prevent pregnancies, sexually transmitted diseases and HIV infection.

During this time period, CBAPP providers recruited 1,832 peer educators and provided 1,012 education sessions. These peer educators led 724 school/community education sessions for a total of 14,567 participants. CBAPP providers also provide individual and group counseling to promote individual responsibility. A total of 17,036 teens received individual counseling while 26,181 received counseling through 6,116 group counseling sessions. CBAPP emphasizes training sessions with the specific purpose being to develop alternatives to sexual activity. 2,721 sessions that included 19,478 participants focused on educational priorities. Vocational information was stressed to 5,622 participants at 1,438 sessions, and finally, 41,748 teens participated in 2,264 recreational sessions.

An emphasis is also placed on providing information and education to parents and other adults to address the prevention of unintended pregnancy. During this period, 4,364 parents participated in 716 educational sessions, 4,519 health and human service workers participated in 1,528 educational sessions, and 1,016 teachers attended 59 educational sessions. Such strategies implemented through CBAPP aim to build community and individual awareness and support for teens in the prevention of unintended pregnancy.

There are a number of family planning agencies that also receive CBAPP funding. As a result of the co-location of programs, CBAPP clients often benefit from family planning health education and medical services.

2004 STATISTICAL REPORT ON THE OPERATIONS OF NYS TEMPORARY ASSISTANCE PROGRAMS

	Annual Averages (10/02 - 9/03)	Approximate Standard Error	Approximate 95% Confidence Limits	
			Lower	Upper
J. Data related to disabled and work-limited recipients				
4. No. of current recipients of public assistance found to be disabled \11	17,400	± 900	15,600	19,200

(Also see **General Comments** in the work activities table Section 149.2.c.)

\11 Average monthly number of disabled individuals who are exempt from participating in work activities. Under Section 332-b of the Social Services Law disabled individuals who are determined to be unable to engage in work activities are exempt in New York from participating in work activities. Despite this exemption, the TANF family is included in the calculation of the participation rate.

*** Note:** The **standard error**, or standard deviation, of a sample estimate indicates how close the sample estimate comes to the corresponding unknown measurement for the entire population. The standard error of a sample estimate gives us the precision, that is, the range in which the true population value most likely falls. The true population value is expected to lie between these limits. The confidence levels give us the likelihood or probability that it will fall within that range, that is, the assurance that the true value would fall in this range. A 95% confidence level tells us that if we pick 100 similar samples from the population, the sample estimate would fall within approximately plus or minus 2 standard errors of the true value in 95 of those samples. (These are referred to as the upper and lower confidence limits.)

For example, the annual average of the number of TANF recipients found to be exempt due to a disability is 17,400 with an approximate standard error of 900. The approximate lower confidence limit is $17,400 - (2)(900) = 15,600$, and the corresponding upper confidence limit is $17,400 + (2)(900) = 19,200$. While it is not likely that the true population value is exactly 17,400 (the value based on the sample), we are 95% confident that the true population value is between 15,600 and 19,200.

The standard errors of the number of participants possessing a given characteristic, e.g. engaged in a certain type of work activity, were obtained by calculating the standard error of the proportion of those individuals in the sample. The proportions were then applied to total population of the TANF cases. Therefore, the result is a measure of the number of participants with a given characteristic in the entire population.

The results obtained were based on monthly stratified samples and the stratification process varied, thus the results are approximate. Stratification is a statistical process in which the total population is divided into mutually exclusive subpopulations, prior to sampling. This process was required by the federal government in order to better gauge the characteristics of the subpopulations.

2004 STATISTICAL REPORT ON THE OPERATIONS OF NYS TEMPORARY ASSISTANCE PROGRAMS

	Annual Averages (10/02 - 9/03)	Approximate Standard Error	Approximate 95% Confidence Limits	
			Lower	Upper
J. Data related to disabled and work-limited recipients				
4. No. of current recipients of public assistance found to be disabled \11	6,000	± 400	5,200	6,800

(Also see **General Comments** in the work activities table Section 149.2.c.)

\11 Average monthly number of disabled individuals who are exempt from participating in work activities. Under Section 332-b of the Social Services Law disabled individuals who are determined to be unable to engage in work activities are exempt in New York from participating in work activities. Despite this exemption, the SSP-MOE family is included in the calculation of the participation rate.

* **Note:** The **standard error**, or standard deviation, of a sample estimate indicates how close the sample estimate comes to the corresponding unknown measurement for the entire population. The standard error of a sample estimate gives us the precision, that is, the range in which the true population value most likely falls. The true population value is expected to lie between these limits. The confidence levels give us the likelihood or probability that it will fall within that range, that is, the assurance that the true value would fall in this range. A 95% confidence level tells us that if we pick 100 similar samples from the population, the sample estimate would fall within approximately plus or minus 2 standard errors of the true value in 95 of those samples. (These are referred to as the upper and lower confidence limits.)

For example, the annual average of the number of SSP-MOE recipients found to be exempt due to a disability is 6,000 with an approximate standard error of 400. The approximate lower confidence limit is $6,000 - (2)(400) = 5,200$, and the corresponding upper confidence limit is $6,000 + (2)(400) = 6,800$. While it is not likely that the true population value is exactly 6,000 (the value based on the sample), we are 95% confident that the true population value is between 5,200 and 6,800.

The standard errors of the number of participants possessing a given characteristic, e.g. engaged in a certain type of work activity, were obtained by calculating the standard error of the proportion of those individuals in the sample. The proportions were then applied to total population of the SSP-MOE cases. Therefore, the result is a measure of the number of participants with a given characteristic in the entire population.

The results obtained were based on monthly stratified samples and the stratification process varied, thus the results are approximate. Stratification is a statistical process in which the total population is divided into mutually exclusive subpopulations, prior to sampling. This process was required by the federal government in order to better gauge the characteristics of the subpopulations.

Welfare Reform Act of 1997

(section 149 of Part B of Chapter 436 of the Laws of 1997)

S 149.

1. The department of social services or its successor agencies and the department of labor shall collect data related to the operation of public assistance programs including, but not limited to, information that must be submitted to the department of health and human services pursuant to the personal responsibility and work opportunities reconciliation act of 1996 (P.L. 104-193) and any other provision of federal or state law or regulations governing programs administered under title iv-a of the social security act or the social services law. Social services districts shall assist each agency in accumulating such data in accordance with instructions from the appropriate agency.
2. Each agency shall make reasonable efforts to collect and maintain the data required pursuant to this subdivision. Data collection shall begin as soon as practicable, but in no case later than upon the completion of the redesign of the welfare management system and the completion of welfare to work caseload management system. The responsible agency shall collect the data related to applicants and recipients of public assistance programs established pursuant to the personal responsibility and work opportunities reconciliation act of 1996 (P.L. 104-193) and the social services law including, but not limited to, the following:
 - a. Data related to applicants seeking public assistance including but not limited to:
 1. Number of applicants accepted to participate in each program;
 2. Number of applicants who are denied public assistance and the reason for denial;
 3. Number of applicants who were previous recipients of public assistance on or after December 2, 1997 including length of time previously on assistance; reason for initial termination; length of time between termination and reapplication; and reason for reapplication; and
 4. Number of applicants who have resided in the state for fewer than twelve months at the time of application.
 - b. Data related to recipients of public assistance including but not limited to:
 1. Number of terminated recipients of public assistance and reason for termination; and
 2. Number of recipients that move between public assistance programs.
 - c. Data related to work activities subsidized or otherwise sponsored by the department of social services, its successor agencies, the department of labor, or social services districts including but not limited to:
 1. Number of recipients participating in work activities;
 2. Number of recipients receiving an exemption from participating in work activities;
 3. The duration of and reasons for such exemptions;
 4. Number of participants receiving subsidized child care and the number of exemptions granted due to lack of available child care;
 5. The type of work activities;
 6. Hours of work per week per recipient;
 7. Duration of enrollment in such work activity;

Welfare Reform Act of 1997

(section 149 of Part B of Chapter 436 of the Laws of 1997)

8. Reason for termination from work activity;
9. Number of requests for administrative hearings related to work activity participation including the nature of such requests by general categories and the outcome of such hearings;
10. Number of participants receiving subsidized transportation services;
11. Participant retention in work activities by type of work activity;
12. Length of time before assignment to a work activity;
13. Number of recipients changing work activity assignments and reasons for such changes; and
14. Expenditures by social services districts in support of work activities.

d. Data related to unsubsidized work activities including but not limited to:

1. Number of recipients hired;
2. Initial rate of pay by either annual salary or wage basis;
3. Retention rates;
4. Means of obtaining unsubsidized employment including, but not limited to, referral by the social services district and direct contact with employer; and
5. Number of participants receiving subsidized child care and/or transportation services.

e. Data related to recipient training and education activities including but not limited to:

1. Number of recipients in training or educational activities by type of activity;
2. Number of recipients mandated to attend training or education activities that fulfill work participation requirements;
3. Length and duration of training or education activity including the number of hours per week and duration;
4. Number of recipients receiving subsidized child care and/or transportation services;
5. Number of recipients transferred to work activities;
6. To the extent available, the number of recipients who obtain work directly from training or education activities including starting salary and employee retention rates; and
7. Expenditures by social services districts in support of training and education activities.

f. Data related to recipient sanctions including but not limited to:

1. Number of sanctions, by type of sanction;
2. Number of sanctions with defined minimum period, by type of sanction;
3. Average length of sanction until recipient compliance, by type of sanction;
4. Amount of sanction, by type of sanction;
5. Period of time starting on or after December 2, 1996 that the participant was in the program prior to the sanction;
6. Number and outcome of administrative hearings related to sanctions, by type of sanction; and
7. Number of sanctions against entire assistance unit.

Welfare Reform Act of 1997
(section 149 of Part B of Chapter 436 of the Laws of 1997)

g. Data related to case closings including but not limited to:

1. Number of case closings;
2. Reason for case closing including, but not limited to, self-termination without reason;
3. Length of time receiving assistance on or after December 2, 1996 before case closing;
4. On an aggregate basis, the length of time recipients do not receive public assistance in New York state following case closing occurring on or after December 2, 1996; and
5. Number of former public assistance recipients receiving subsidized child care and/or transitional medical assistance.

h. Data related to substance abuse treatment programs including but not limited to:

1. Number of recipients receiving substance abuse treatment services for which the cost of such services is paid for by the social services district using public assistance monies;
2. Length of reimbursed recipient participation in treatment program; and
3. Types of substance abuse treatment programs receiving reimbursement from social services districts.

i. Data related to pregnancy prevention programs funded through federal monies received by the state pursuant to title iv-a of the social security act including but not limited to:

1. Number of program participants;
2. Duration of program participation; and
3. Types of services provided.

j. Data related to disabled and work limited recipients of public assistance pursuant to provisions of the welfare reform act of 1997 including, but not limited to:

1. Number of persons applying for public assistance that are screened;
2. Number of current recipients of public assistance screened;
3. Number of persons applying for public assistance that are found to be disabled;
4. Number of current recipients of public assistance found to be disabled;
5. Number of persons applying for public assistance found to be work limited;
6. Number of current recipients of public assistance found to be work limited;
7. Duration of finding by category;
8. Number of changes in work activity exemption status;
9. Number and outcome of administrative hearings related to the disability screening and the determination of work activity exemptions; and
10. Data relating to work and training and education activities pursuant to subsections c, d and e of this section.

h. Data related to the food assistance program including but not limited to:

Welfare Reform Act of 1997

(section 149 of Part B of Chapter 436 of the Laws of 1997)

1. Number of applicants under eighteen years of age by chronological age;
2. Number of applications denied by reason for denial;
3. Number of recipients under eighteen years of age by chronological age and the average amount of food assistance benefits per recipient issued by the social services district;
4. Number of recipients under eighteen years of age by case and by household and the average amount of food assistance benefits issued per case and per household by the social services district;
5. Number of recipients under eighteen years of age in a case and/or in a household where other individuals in the case and/or household are in receipt of federal food stamp benefits and the average amounts of federal and state food stamp benefits issued per case and/or per household by social services district;
6. Number of recipients under eighteen years of age in a case or household receiving other public assistance benefits and the average amounts of food assistance benefits issued per recipient and per public assistance case by the social services district;
7. Number of case closings for cases where the recipient is under eighteen years of age by reason for case closing including but not limited to case closing as a result of naturalization;
8. Number of applicants applying for food assistance benefits where the primary reason for potential eligibility is a disability as defined by provisions of this act establishing a food assistance program;
9. Number of applications denied by reason for denial;
10. Number of disabled recipients by chronological age and the average amount of food assistance benefits per recipient issued by the social services district;
10. Number of disabled recipients by case and by household and the average amount of food assistance benefits issued per case and per household by the social services district;
11. Number of disabled recipients in a case and/or in a household where other individuals in the case and/or household are in receipt of federal food stamp benefits and the average amounts of federal and state food stamp benefits issued per case and/or per household by social services district;
12. Number of disabled recipients in a case or household receiving other public assistance benefits and the average amount of food assistance benefits issued per recipient and per public assistance case by the social services district including, but not limited to, receipt of federal and/or state supplemental payment made pursuant to title xvi of the social security act;
13. Number of case closings for cases where the recipient is disabled by reason for termination including but not limited to case closing as a result of naturalization;
14. Number of applicants applying for food assistance benefits where the primary reason for potential eligibility is that the applicant is elderly as defined by provisions of this act establishing a food assistance program;
15. Number of applications denied by reason for denial;
16. Number of elderly recipients by chronological age and the amount of food assistance benefits per recipient issued by the social services district;
17. Number of elderly recipients by case and by household and the average amount of food assistance benefits issued per case and per household by the social services district;

Welfare Reform Act of 1997

(section 149 of Part B of Chapter 436 of the Laws of 1997)

18. number of elderly recipients in a case and/or in a household where other individuals in the case and/or household are in receipt of federal food stamp benefits and the average amount of federal and state food stamp benefits issued per case and/or per household by the social services district;
19. Number of elderly recipients in a case or household receiving other public assistance benefits and the average amount of food assistance benefits issued per recipient and per public assistance case by the social services district including, but not limited to, receipt of federal and/or state supplemental payment made pursuant to title xvi of the social security act; and
20. Number of case closings for cases where the recipient is elderly by reason for termination including but not limited to case closing as a result of naturalization; and
21. Number and outcome of administrative hearings related to the food assistance program by general category.

h. Data related to the domestic violence screening process including but not limited to:

1. Number of applicants and recipients screened;
2. Number of positive findings;
3. Number of waivers by category granted as a result of a positive finding; and
4. Duration of such waiver.

3. To the extent possible, the data collection activities required by this act shall be designed to collect data in the least expensive and least time consuming manner possible. Scientifically acceptable statistical sampling methods may be used to collect and maintain data on an aggregate basis when authorized by the department of health and human services or when the commissioner of social services or commissioners of its successor agencies determines that collection of such data by any other means is not practicable or would result in significant additional costs. To the extent that statistical sampling is used to collect and maintain data, and unless otherwise required by the department of health and human services, the sample size shall be no larger than the sample size required by the United States department of agriculture for food stamp quality control purposes pursuant to the food stamp act of 1977 and subsequent amendments.
4. The commissioner of social services or commissioners of its successor agencies, and the commissioner of labor shall provide reports summarizing data collected pursuant to this act to the temporary president of the senate, the chairperson of the senate finance committee, the speaker of the assembly, and the chairperson of the assembly ways and means committee. The first such report shall be provided to the temporary president of the senate, the chairperson of the senate finance committee, the speaker of the assembly, and the chairperson of the assembly ways and means committee no later than December 2, 1998 and annually thereafter. The commissioner of social services or the commissioners of its successor agencies, in conjunction with the commissioner of health and the commissioner of labor, shall provide the temporary president of the senate, the chairperson of the senate finance committee, the speaker of the assembly, and the chairperson of the assembly ways and means committee with an annual report summarizing data collected pursuant to this act.

Welfare Reform Act of 1997

(section 149 of Part B of Chapter 436 of the Laws of 1997)

5. Each agency shall provide the temporary president of the senate, the chairperson of the senate finance committee, the speaker of the assembly, and the chairperson of the assembly ways and means committee with all reports filed with the department of health and human services pursuant to the data collection and reporting requirements of the personal responsibility and work opportunities reconciliation act of 1996 (P.L. 104-193).

6. The commissioner of social services or the commissioners of its successor agencies, in conjunction with the commissioner of labor, and the commissioner of health shall develop a plan to provide the legislature with the ability to have online access to the welfare management system and the welfare to work caseload management system upon completion of the redesign of the welfare management system and implementation of the welfare to work caseload management system for purposes of obtaining aggregate program data. Such plan shall provide for security measures necessary to ensure the confidentiality of data residing on the welfare management system and the welfare to work caseload management system in conformance with all applicable federal and state laws and regulations. The plan shall be submitted to the temporary president of the senate and the speaker of the assembly no later than February 15, 1998.
